

Name: Nirmal Avhad

Roll No: 71

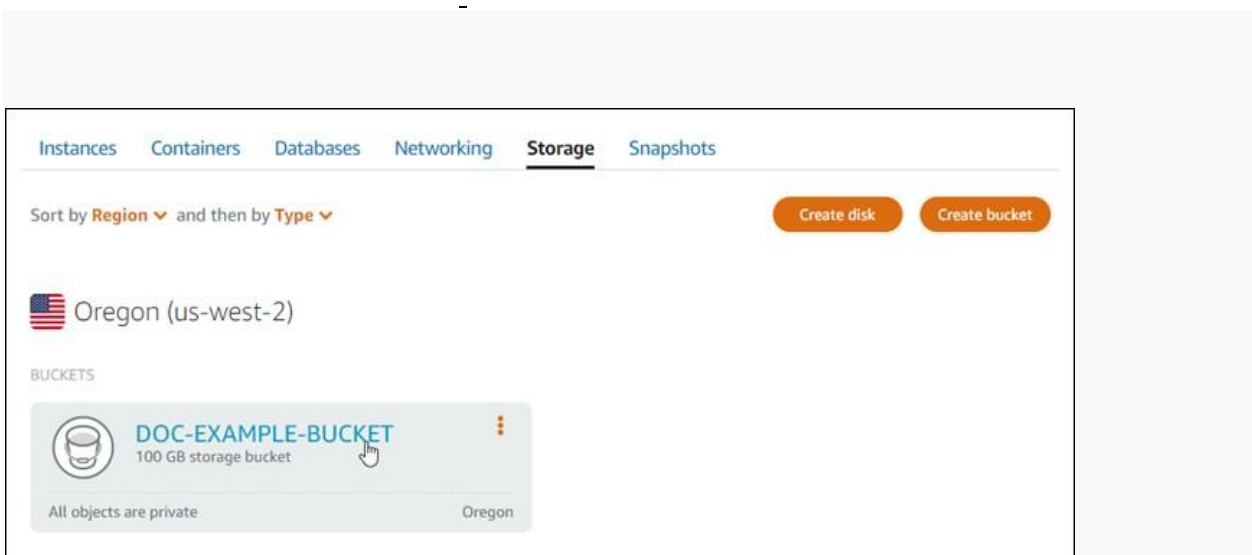

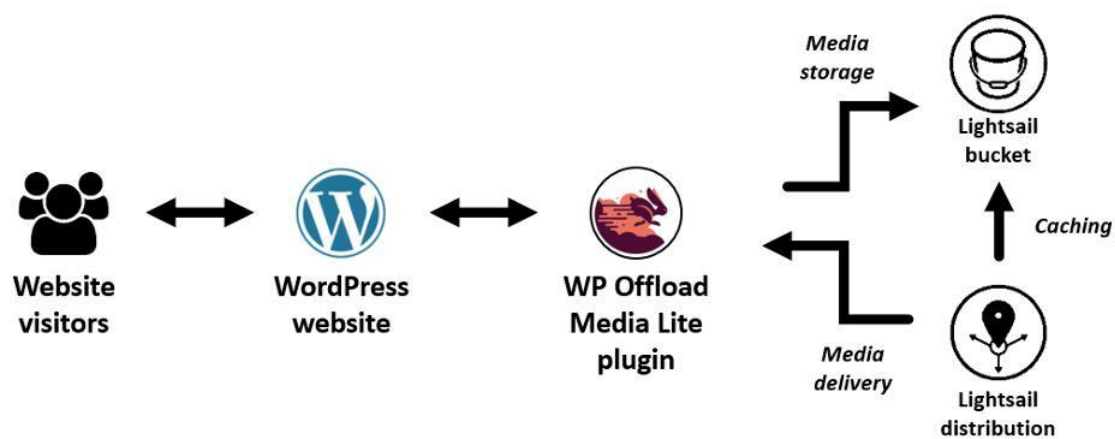

Subject: Cyber Security

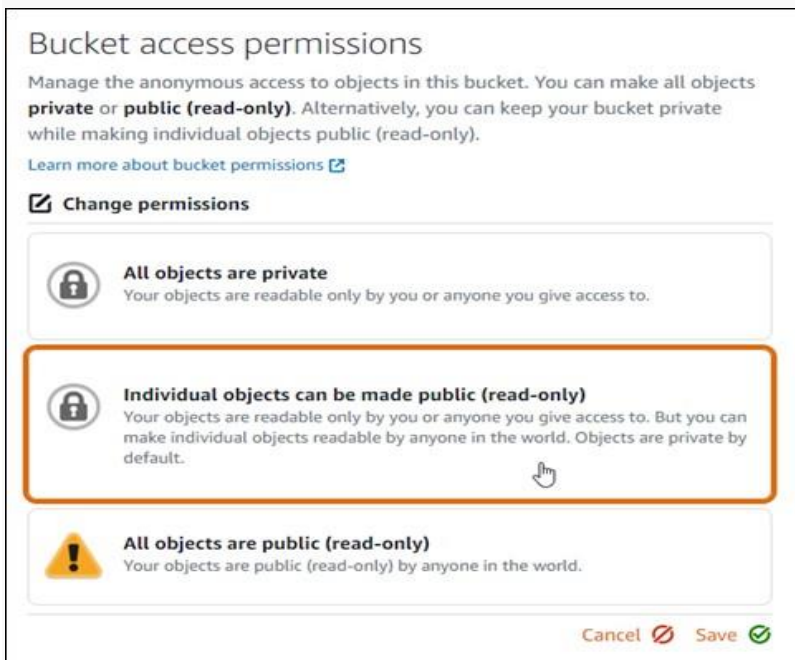

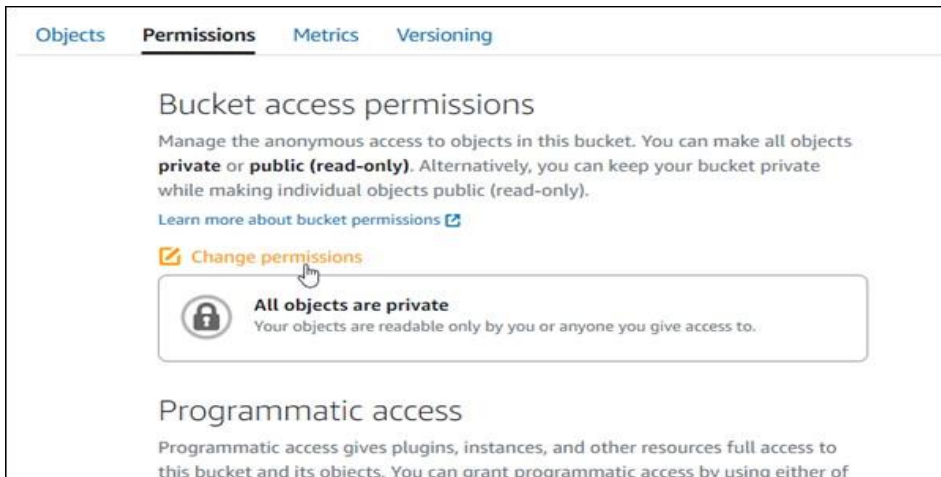

Class : TE

Branch: AI & DS

## Practical – 11

**Problem statement :** Setup, Create and connect your Word Press site to an object storage bucket using Lightsail service.

2.8 — Scroll to the Resource access section of the page, and choose Attach instance.

Good morning!

Filter by name, location, tag, or type

Instances Containers Databases **Networking** Storage Snapshots

Create static IP

Create DNS zone

Create load balancer

Create distribution

Learn more about network resources

## Choose your origin ?

Your origin can be an instance with an attached static IP, a bucket, or a load balancer that has at least one instance attached to it. Your distribution pulls and caches content from the origin that you choose.

[Learn more about content delivery networks and origins](#)

Select an origin from the **Oregon** (us-west-2) Region.

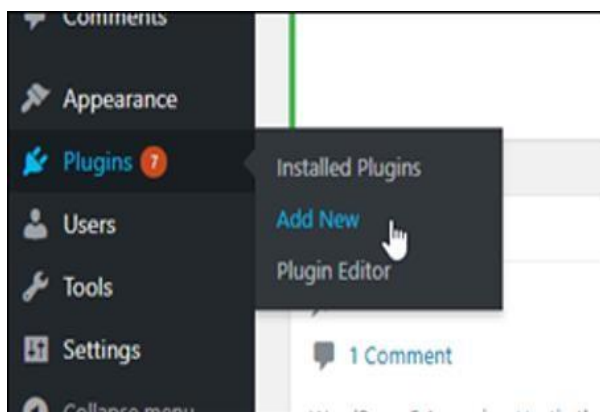

Choose an origin

## Identify your distribution

Your Lightsail resources must have unique names.

Distribution-1

Create distribution

STORAGE PROVIDER

☒  **Amazon S3**

☐ Define access keys in wp-config.php

☒ My server is on Amazon Web Services and I'd like to use IAM Roles  
If you host your WordPress site on Amazon Web Services, choose this option and make use of IAM Roles. [More info >](#)

☐ I understand the risks but I'd like to store access keys in the database anyway (not recommended)

☐  **DigitalOcean Spaces**

☐  **Google Cloud Storage**

What bucket would you like to use?

Provider: **Amazon S3** [Change](#)

Bucket:

[Browse existing buckets](#) [Create new bucket](#) [Save Bucket Setting](#)

☒ **ON** **Force HTTPS**  
By default we use HTTPS when the request is HTTPS and regular HTTP when the request is HTTP, but you may want to force the use of HTTPS always, regardless of the request. [More info »](#)

**ADVANCED OPTIONS**

☒ **ON** **Remove Files From Server**  
Once a file has been copied to the bucket, remove it from the local server. [More info »](#)

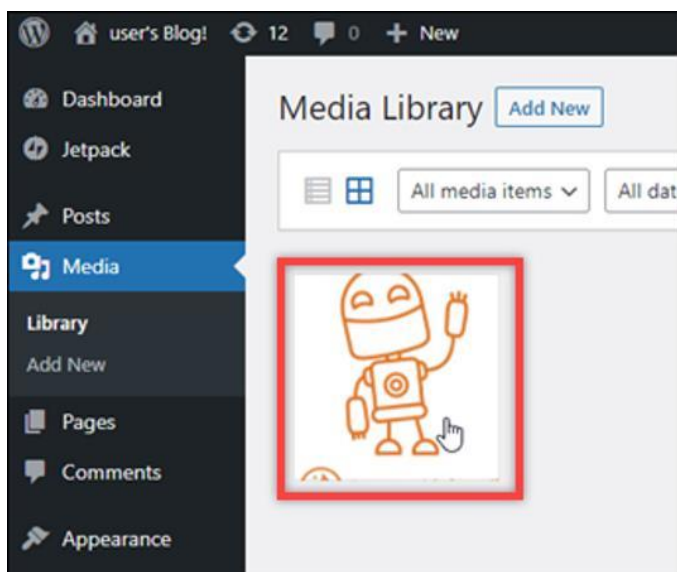

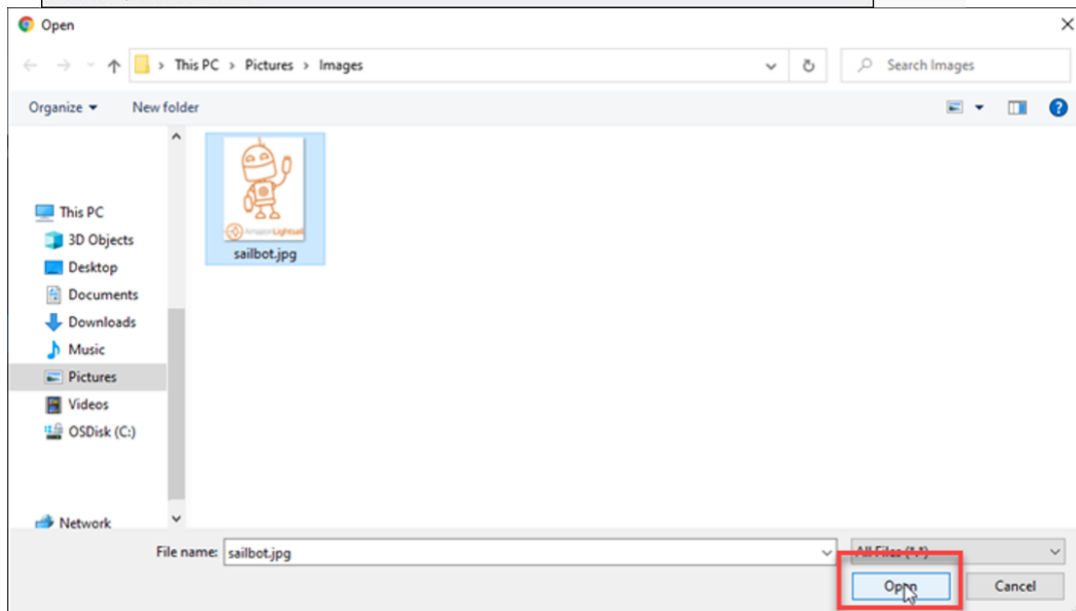

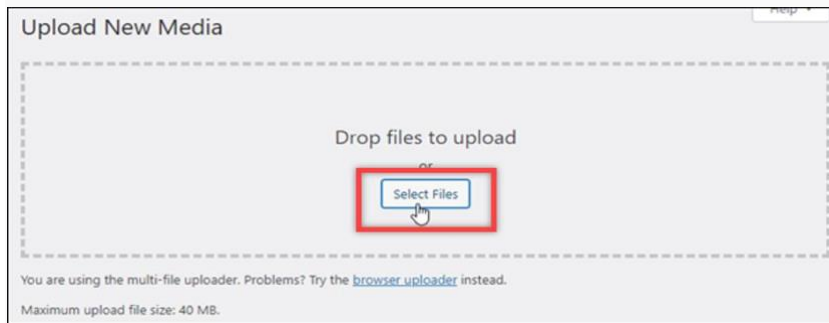

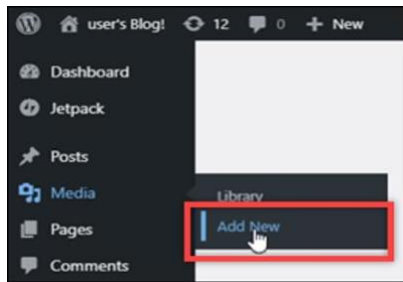

**Warning** — Some plugins depend on the file being present on the local server and may not work when the file is removed. [More info »](#)  
  
If you have a backup system in place (as you should) that backs up your site files, media, and database, your media will no longer be backed up as it will no longer be present on the filesystem.

**DELIVERY**

Provider: **Amazon S3** [Change](#)

☒ **ON** **Rewrite Media URLs**

☒ **ON** **Custom Domain (CNAME)**  
We strongly recommend you configure a subdomain of robbbox123.net to point at your Amazon CloudFront distribution. If you don't enter a subdomain of your site's domain in the field below it will negatively impact your site's SEO. [More info »](#)
